PROFESSIONAL SUMMARY

Software Engineering student (UFC) and Full Stack Developer focused on robust backend development with Java (Spring Boot) and Node.js (NestJS), and dynamic interfaces with React and Next.js. Specialist in Web3/Blockchain (Solidity/EVM, Rust/Stellar/Soroban and SUI), with Technological Training in Web 3.0 from Instituto iRede. Participated in global hackathons, currently serves as a Web 3.0 Resident Developer, and applies Generative AI and Clean Code practices to accelerate secure deliveries.

TECHNICAL SKILLS

- **Blockchain & Smart Contracts:** Solidity, EVM, Rust (Soroban, SUI/Move), Foundry, Hardhat, Ethers.js, ERC-20/721/1155 Tokens, Oracles.
- **Backend & Architecture:** Java (Spring Boot, JPA, Security), Node.js (NestJS, Express), Clean Architecture, SOLID, Microservices, RabbitMQ.
- **Modern Frontend:** TypeScript, JavaScript, React.js, Next.js, Tailwind CSS, Chakra UI, Vite.
- **Data & DevOps:** PostgreSQL, MySQL, MongoDB, Prisma ORM, Docker, Containers, AWS, CI/CD, Git, GitHub.
- **Quality & Innovation:** Clean Code, Unit Testing/QA, Refactoring, Scrum, Code Review.

PROFESSIONAL EXPERIENCE

Web 3.0 Resident Developer — iRede

July 2026 – Present

- Selected in the National Top 8 for the innovation hub focused on decentralized network architecture.
- Development of Smart Contracts in Solidity (EVM) for ERC-20, ERC-721, and ERC-1155 standards focused on real-world traceability.
- On-chain and off-chain integrations with oracles and external APIs, ensuring data integrity and encryption.

Full Stack Developer — Ideedutec (EdTech)

April 2026 – July 2026

- Built complex analytics dashboards in Next.js/Chakra UI and migrated critical routes to SSR in NestJS.
- Data modeling with PostgreSQL and Prisma ORM, optimizing queries and drastically reducing API latency.

Software Development Teaching Assistant (Web and Mobile) — UFC

March 2026 – July 2026

- Technical support and Code Review for undergraduate students (SOLID, testing, and LLM-assisted refactoring).

Junior Full Stack Developer (Temporary) — Switch Pay

October 2025 – December 2025

- Optimization of RESTful APIs and high-criticality financial dashboards using Node.js, React, and MySQL.

Junior Front-End Developer — Brasil Cursinhos

February 2025 – February 2026

- Built reusable, high-performance components with React, Next.js, and TypeScript, reducing load time.

ENGINEERING AND RESEARCH PROJECTS

- **Coinconut / SyloPay (ImpactLedger ESG):** Web3 dApp (Solidity/Hardhat on Sepolia Testnet and Soroban/Rust on Stellar) for recycling traceability, with ZK proofs (Noir), React 19/Ethers.js frontend, Soulbound NFTs, and settlement via a PIX Oracle simulator. Global Meridian Hackathon (US\$50k prize pool).
- **Bible Contract (Stellar/Soroban):** Smart contract in Rust (WebAssembly) with authenticity verification via SHA-256 hashes, immutable on-chain reading proofs, reward token (TAL), and 100% unit test coverage.
- **OrderMS (Java Microservices/FinTech):** Distributed architecture for high transaction volume with Java 21, Spring Boot, RabbitMQ, and scalable persistence in MongoDB.
- **EloCiv (UNICEF Youth Challenge 2026):** W3C Verifiable Credentials anchored on Stellar for youth engagement.
- **Heather (XRPL Hackathon):** digital tutor integrated with the XRP network – 3rd Place in the Web3 Track.

EDUCATION, CERTIFICATIONS AND LANGUAGES

Bachelor's Degree in Software Engineering | Federal University of Ceará (UFC)

Expected: Dec 2027

Technical Degree in Information Technology | EEEP Dr. Salomão Alves de Moura

Completed: 2021 (GPA: 9.67)

Certifications: Technological Training in Web 3.0 – iRede, AWS re/Start Graduate, AWS Cloud Foundations, Founding Partner Agentic Space.

Languages: Portuguese (Native), English (Intermediate B1), Spanish (Intermediate B1)
